Professional Summary

Junior Full-Stack Developer with a strong foundation in **HTML, CSS, JavaScript, React**, and beginner-level **Node.js/Express**. Self-taught with hands-on project experience building real-world web applications, including AI-based image analysis tools and browser-based camera detection systems. Passionate about learning system design, writing clean code, and building user-focused applications.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS
Backend: Node.js, Express (basic)
Tools & Platforms: Git, GitHub, REST APIs, Browser APIs, Firebase (Camera, Canvas)
Concepts: Component-based architecture, state management, API integration, responsive design

---

Projects

AI Image Detector App

- Built a React-based web application that analyzes uploaded images to determine whether they are AI-generated or real.
- Designed reusable UI components and implemented client-side image handling.
- Integrated backend logic using Node.js/Express to handle image processing workflows.
- Focused on clean UI, user feedback states, and scalability considerations.

Hidden Camera Detection Web App

- Developed a browser-based camera detection tool using JavaScript, Canvas, and device camera APIs.
- Implemented real-time visual analysis to detect reflective light patterns from hidden cameras.
- Optimized rendering performance and handled camera permissions and error states.
- Styled a responsive, user-friendly interface using Tailwind CSS.

Additional Frontend Projects

- Built multiple small-to-medium React applications to practice component design, hooks, and state handling.
- Converted UI designs into responsive web pages using modern CSS techniques.

Education

Software Development Bootcamp / Self-Taught Developer
- Intensive hands-on learning focused on frontend development and modern JavaScript frameworks. - Ongoing self-study in backend development and full-stack application design.

Strengths

- Strong problem-solving mindset and eagerness to learn
- Ability to understand and debug frontend issues independently
- Comfortable working with documentation and new technologies
- Clear communication and collaborative mindset

Availability

Open to **Junior Full-Stack Developer**, **Internship**, or **Entry-Level Software Developer** roles.
